

Hi Tim,

I have just found the/your website for Priory secondary boys school, Newport, IW.

I would be happy to have my contact details included in the "Contact Point" list in the website.

As I am almost an octogenarian, I have only a very basic level of skill with web issues, not helped by suffering a stroke in 2023, which has made conversations difficult (slow) .

I am now confined to an electric wheelchair but I can get out in it.

Before my stroke, I had been a keen angler and secretary of Bembridge Angling Club.

<https://www.bembridge-angling-club.co.uk/home>

For info:-

I was, eventually, in form 5G .

I was awarded the science prize twice.

Teachers that I remember:- Mr flux (head master), Brian Lansley (forgotten), "Sas" (side-angle-side) Audas (maths), Madam Way (french)

Pupils in my class:- John? Fenwick, Alan Curling, John Meaning,

After leaving PSBS, I joined Saunders Roe (East Cowes) as an apprentice and then as an electrical draughtsman.

I subsequently spent 15 years commuting to Lancing (Sussex) where I became head of the electrical draughting department of Singer-Link Miles, a flight simulator company.

I then returned to the IW and held draughting jobs in several companies until, in 1988, I ended back in Saunders Roe which, by then, had been through several changes of name, eventually becoming GKN Aerospace.

After 15 years at GKN, in 2003 I joined Britten-Norman (aircraft manufacturers) at Bembridge airport from which I retired in 2010.

Regards,

Alan Deeming
